The Behavioral Health Team In Action This presentation will describe and discuss the roles of each member of the behavioral health care team. Throughout this presentation, attendees will learn how to work together as a team to help reduce and resolve the behavioral challenges of patients.

Learning objectives

- Attendees will learn who in the Behavioral Health Care Team is the best fit for which aspects of the patient's care.
- Attendees will learn how to work together as a team to help patients reduce or resolve behavioral challenges.
- Attendees will learn when it is appropriate to refer out to additional credentialed professionals.

Feline Inter-cat Tension Treatment and Training Strategies

In this presentation attendees will review inter-cat tension, its presentation, and how they can advise clients as to its prevention and treatment. Attendees will learn behavioral management and modification strategies to help reduce tension between cats in the home. Additionally, attendees will learn when it is appropriate to refer to a veterinary behaviorist or other credentialed professional.

Learning objectives

- Identify strategies to manage and modify behaviors common to feline inter-cat tension
- Identify when referral to a veterinary behaviorist would be beneficial
- Identify how to prevent inter-cat tension

The Changing Landscape of Training Plans- Interactive Lab

In this learning lab, attendees will learn how to create a counterconditioning and desensitization plan for feline inter-cat tension. Throughout the lab, learners will have the opportunity to reassess and change their plan based on the progress of the cats they are helping. Learners will work as a team to discuss the changing

needs of the cats in their care and provide recommendations that will help improve progress and a favorable outcome.

Learning objectives

- Attendees will make a training plan for feline inter-cat tension
- Attendees will learn when they should reassess and change training plans
- Attendees will work as a team to customize a training plan to it the specific needs of the pet
